

Special Issue

Bioactive Phenolic-rich Extracts: Active Ingredients of Herbal Medicines and Supplements

Message from the Guest Editors

This Special Issue is to provide a comprehensive view of the current scenario regarding the quality assurance of herbal medicines and supplements rich in phenolics, including supply chain, methodological studies, formulation, stability and other topics that might be of interest. Potential topics include, but are not limited to, the following: Study of growing conditions of medicinal plants and their impact on final products; Molecular characterization of enzymes or bioactive compounds between plants varieties and cultivars; Therapeutic botanical extracts with defined chromatographic profile and content of markers; Analytical chemical methodologies able to detect potential adulterants and substituents in herbal products; Extraction optimization using green and novel chemistry approaches; Production strategies to obtain preserved phytochemical extracts; Technological processes applied to botanical extracts; Stability studies of extracts and phytochemical-rich formulations, including monitoring variations of pharmacologically active compounds during the storage and shelf life of products; Innovative processes to prepare extracts with robust qualitative and quantitative properties.

Guest Editors

Dr. Silvana Maria Zucolotto

Dr. Roberta Targino Hoskin

Dr. Geison Modesti Costa

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
