

Special Issue

Advances in Plant Photobiology

Message from the Guest Editor

Plant photobiology is the study of plants' perception, signal transduction, and response to light. Light is an important factor in plant growth and development. Plants regulate their own growth and development by sensing light signals to adapt to changes in the environment. This Special Issue welcomes articles, reviews, and communications focusing on the latest research progress in plant photobiology.

Guest Editor

Dr. Robert Luciński

Department of Plant Physiology, Institute of Experimental Biology,
Faculty of Biology, Adam Mickiewicz University in Poznań, ul
Uniwersytetu Poznańskiego 6, 61-614 Poznań, Poland

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
