

Special Issue

Natural Resources of Medicinal and Cosmetic Plants Volume II

Message from the Guest Editors

Despite the significant progress in the production of synthetic drugs, natural drugs, obtained mainly from plant materials, still play an important role in medicine. In some regions of the world, they are still the basis for this treatment. In highly developed countries, a return to traditional herbalism has been observed for many years. This is due to the widespread belief that herbs, being effective, do not have side effects. Modern drugs based on biologically active substances isolated from plants, for which production and standardization techniques are constantly being improved, can be as effective as synthetic drugs. This Special Issue of *Plants* is addressed to all specialists dealing with medicinal and cosmetic plants in such areas as (1) natural plant resources in particular regions and countries, (2) plant protection, (3) the search for new medicinal and cosmetic species, (4) ethnobotany as a source of information on medicinal and cosmetic plants, and (5) human impact on the environment and medicinal and cosmetic plants.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
