

Special Issue

Crops and Agriculture in Medieval Age in Europe

Message from the Guest Editors

One of the most debated topics of the medieval history concerns the great economic transformations related to changes in agricultural production systems starting from the fall of the Roman Empire; but the our knowledge on production systems, method of cereal storage and diversity of plant crops of the Medieval period is based mostly on historical sources. This Special Issue of *Plants* will collect archaeobotanical research on the food plants (cultivated and wild) such as cereals, pulses, fruits and vegetables used in the diet of the European Middle Ages. We welcome original research papers, methods, reviews, and perspectives, able to provide a clearer picture on the plant economy of the Medieval period.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
