

Special Issue

Microorganisms and Their Metabolic By-Products in the Soil-Plant System

Message from the Guest Editors

This Special Issue wants to elucidate the effects and roles of beneficial microorganisms and their byproducts on the soil-plant system in order to increase the knowledge within the scientific community, industries, and agronomists, and to provide a better understanding of the mode of action and application procedure of microorganisms and their by-products to different soil-plant systems.

Guest Editors

Dr. Ivana Puglisi

Dr. Vito Armando Laudicina

Prof. Dr. Alessandro Vitale

Prof. Dr. Andrea Baglieri

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
