

Special Issue

Natural Resources of Medicinal and Cosmetic Plants

Message from the Guest Editor

Despite the significant progress in the production of synthetic drugs, natural drugs, obtained mainly from plant materials, still play an important role in medicine. The production of drugs based on natural resources can be an important element of sustainable development, the necessity of which we are becoming more and more aware of. The same situation prevails in the cosmetics industry, where products based on natural ingredients are very popular. This Special Issue of *Plants* is addressed to all specialists dealing with medicinal and cosmetic plants in such areas as (1) natural plant resources in particular regions and countries, (2) plant protection, (3) searching for new medicinal and cosmetic species, (4) ethnobotany as a source of information on medicinal and cosmetic plants, and (5) human impact on the environment and medicinal and cosmetic plants. About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
