

## Special Issue

# Plant Adaptation to Climate Change

### Message from the Guest Editor

The Earth's climate, and the concentration of CO<sub>2</sub> in the atmosphere, have changed significantly since the beginning of the Industrial Revolution in Europe, and are projected to continue changing. In addition to changes in temperature and CO<sub>2</sub>, ozone concentrations, and drought and flooding frequencies have changed or will probably change. Besides having important direct effects on plants, these changes may affect adaptive responses of plants, both crop and non-crop, to the altered environment. Many innovative exposure systems have now been developed to quantify plant responses to global change conditions. This Special Issue aims to assess current understanding of what heritable attributes of plants have already changed or likely will change as plants adapt or are adapted by breeding programs to these environmental changes.

### Guest Editor

Dr. James A. Bunce

Adaptive Cropping Systems Laboratory, Beltsville Agricultural Research Center, Beltsville, MD 20705, USA

### Deadline for manuscript submissions

closed (30 November 2017)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
