

Special Issue

Plant-Insect Interactions

Message from the Guest Editors

If the whole life history of a plant is a “drama”, insects must be the protagonists on the “arena”. They bring “harm” to plants and “steal” their resources; they play roles as faithful “bodyguards” by fighting against herbivores; they are also “cupids” for plants and promote their reproduction. Humans have always been fascinated by this “drama”, exploring wisdom in crop protection and yield promotion that can be achieved through it. With the rapid development of biotechnology, we now have a deeper understanding of plants’ response to insects and begun to produce insightful “reviews” of this “drama”. We are pleased to announce the launch of a new Special Issue on “Plant–Insect Interactions” in the *Plants* journal. This issue will highlight the phenotypical responses of plants to insects, the biological function of plant specialized metabolites in these responses, and the molecular and evolutionary basis for interactions between plants and insects.

Guest Editors

Prof. Dr. Wenwu Zhou

Institute of Insect Sciences, Zhejiang University, Hangzhou, China

Dr. Ran Li

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
