

Special Issue

Genetic and Environmental Factors Influencing Anthocyanin Pigmentation in Crop Plants

Message from the Guest Editors

This Special Issue of *Plants* will highlight genetic and environmental components affecting anthocyanin pigmentation in crops. Studies concerning the genetic mapping of simply inherited and quantitative trait loci (QTLs); functional and candidate gene analyses, including gene editing and other transgenic approaches; and genomic and transcriptomic analyses of phenotypic variants related to any aspect of anthocyanin metabolism. Similarly, studies that evaluate environmental factors (considered in a broad sense) influencing anthocyanin pigmentation, including biotic and abiotic stressors (e.g., drought, salinity, UV light, extreme temperatures, animal and pathogen attack, etc.), are also welcome. Manuscripts can be submitted until the deadline. All papers will be peer-reviewed. Manuscripts will be continuously published as they are revised and accepted.

Guest Editors

Dr. Pablo F. Cavagnaro
Dr. Philipp W. Simon
Dr. Massimo Iorizzo

Deadline for manuscript submissions

closed (30 September 2022)

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
