

Special Issue

Stress-Resilient Maize for Climate-Vulnerable Environments

Message from the Guest Editors

Maize (*Zea mays* L.) is an important food, nutrition, and climate security crop around the world. The Special Issue of *Plants*, entitled “Stress-Resilient Maize for Climate-Vulnerable Environments”, provides a unique opportunity to publish the most recent research findings: from integrated genomics to cropping systems related to key aspects for genetic, genomic, agronomic and other omics trait-related improvements, and the breeding of maize and their efficient cultivation management strategies.

Guest Editors

Dr. Ivica G. Djalović

Institute of Field and Vegetable Crops, National Institute of the Republic of Serbia, Maxim Gorki 30, 21 000 Novi Sad, Serbia

Dr. David Caparros-Ruiz

Centre for Research in Agricultural Genomics (CRAG, Consortium CSIC-IRTA-UAB-UB), Campus UAB, CRAG Building, Cerdanyola, 08193 Barcelona, Spain

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
