Heavy Metal Damage and Tolerance in Plants

Message from the Guest Editors

Heavy metals are global environmental pollutants. Most plants have a small tolerance range to heavy metals, and exposure to excessive heavy metals may damage various aspects of plants. However, some plants have evolved super tolerance to heavy metals. The understanding of the multilevel mechanisms underlying plant responses to heavy metal stresses is important for improving plant vitality and quality in heavy-metal-contaminated areas, as well as for the phytoremediation of contaminated environments. As of the “**Heavy Metal Damage and Tolerance in Plants**” Special Issue of *Plants*, we would like to invite you to contribute a paper covering the mechanisms of plant responses to heavy metals at the ecological, morphological, physiological, biochemical, molecular, or genetic levels. In particular, studies uncovering original mechanisms of plant responses to heavy metals on the basis of frontier biotechnology or novel perspectives would be highly appreciated.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
