

# Topical Collection

## Bryophyte Biology

### Message from the Collection Editor

This topical collection, “Bryophyte Biology”, aims to showcase high-quality research articles, short communications, and review articles in all fields related to bryophytes, since they are often neglected and scarcely discussed across journals. The collection of this research will allow rapid information exchange among bryophyte biologists worldwide. Selected works for this issue on “Bryophyte Biology” will address bryophyte features that have been obscured, lack confirmation, and are not well-documented in the literature. These features are also often assumed to be the same within the study of tracheophyte biological characteristics.

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
