

Special Issue

Diversity and Classification of Bryophytes

Message from the Guest Editor

The Special Issue '*Diversity and Classification of Bryophytes*' aims to delve into the intricate world of mosses, liverworts, and hornworts, exploring their vast diversity and ecological significance. Contributions to this issue can span phytogeographical questions, ecological investigations, taxonomic studies, or even evolutionary relationships within bryophyte lineages. We invite researchers to submit original research articles shedding light on the diversity and classification of bryophytes. From morphological descriptions to molecular phylogenetics, this Special Issue will synthesize diverse approaches to comprehensively understand the taxonomy and evolutionary history of bryophytes.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
