

Special Issue

Sustainable Strategies for Managing Plant Diseases

Message from the Guest Editor

This Special Issue delves into cutting-edge research and practical applications aimed at minimizing the impact of plant pathogens while promoting ecological balance and agricultural sustainability. From advanced biotechnological interventions to eco-friendly farming practices, the issue covers a spectrum of strategies designed to enhance plant health, resilience, and productivity. Key topics include biocontrol agents, precision agriculture techniques, integrated pest management, genetic resistance breeding, and the utilization of beneficial microorganisms. By synthesizing interdisciplinary insights, the issue aims to foster collaboration among scientists, policymakers, and practitioners to address the global challenge of plant disease management in a sustainable and holistic manner. Dr. El Jarroudi Moussa

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
