

## Special Issue

# The Molecular Biology of Plant Cells

### Message from the Guest Editor

This Special Issue is focused on research that adds to our understanding of the molecular and biochemical mechanisms which gives rise to the properties of plant cells. The scope of this SI includes the specialization of plant cells, cell–cell interactions, and responses to the environment. Studies on both model plants and crop species are welcome, as are review articles in this area.

### Guest Editor

Dr. Chris Helliwell

CSIRO Agriculture and Food, Canberra, ACT 2601, Australia

### Deadline for manuscript submissions

closed (31 July 2023)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
