Plant Abiotic Stress: Mechanisms, Tolerance and Sustainable Management

Message from the Guest Editors

Plants face increasingly frequent and severe abiotic stresses in their environments, most notably drought, salinity, extreme temperatures, nutrient deficiencies, and heavy metal toxicity. All of these stresses could have serious adverse effects on plant growth, development, and productivity, thus posing serious challenges to food security and the sustainability of agriculture. In this Special Issue, we explore recent advances and discoveries on the following topics:

- Mechanisms of plant response to abiotic stresses;
- Signal pathways and regulatory networks involved in stress perception and adaptation;
- Biotechnological approaches and breeding strategies for engineering and developing abiotic stress resilient cultivars;
- Agronomic and management practices for sustainable cultivation under abiotic stress conditions;
- Applications of omics technologies to unravel the complexities of plant stress biology;
- Field evaluation of abiotic stress management methods.

Guest Editors

Prof. Dr. Mohamed El Yamani

Laboratory of Natural Resources and Environment, Polydisciplinary Faculty of Taza, Sidi Mohamed Ben Abdellah University, Taza, Morocco

Dr. James A. Bunce

Adaptive Cropping Systems Laboratory, Beltsville Agricultural Research Center, Beltsville, MD 20705, USA

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
