

Special Issue

Genetics and Breeding of Nut Crops and Other Fruit Crops

Message from the Guest Editor

Breeding is one of the most important activities in having novel bred varieties to improve the value of grown fruit species. Improvements can be achieved in production safety, phenology, ripening time, fruit quality, compounds, resistance/tolerance to the most important biotic or abiotic factors, and consumer preference.

During breeding activity, new values are always created. Today, we can use different methods; these may be old or modern, but the aim is similar, nonetheless. For this Special Issue, we are looking for papers detailing this; moreover, papers on all fruit species are welcome.

There is a preference for the submissions of papers on comparison studies, whereby different varieties from the same species are compared to one another from different perspectives. Indeed, breeding results constitute the core interest of researchers, growers, and nurseries, so the whole fruit sector is on the lookout for them.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
