Special Issue

Alkaloids: Chemical Structures with Pharmaceutical Potential

Message from the Guest Editors

Alkaloids are natural products obtained from a wide range of organisms, mainly plants. They have attracted the attention of scientists from different research backgrounds due to their chemical diversity and notable biological and pharmacological properties, as well as their potential to be applied in therapeutic settings. In this Special Issue, we invite manuscript submissions on alkaloid natural sources and their chemical identification/characterization, as well as on their biological properties and pharmacological potential.

Guest Editors

Prof. Dr. Jaume Bastida

Group of Natural Products, Faculty of Pharmacy and Food Sciences, University of Barcelona, Av. Joan XXIII, 27-31, 08028 Barcelona, Spain

Dr. Luciana R. Tallini

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
