

Special Issue

Ecology, Biogeography and Evolutionary Biology of Tropical Ecosystems

Message from the Guest Editors

Tropical ecosystems are at risk due to global change. In this Special Issue, we aim to address the critical changes that could affect these ecosystems in the short, middle, and long term. The papers will expose and discuss the impacts of anthropogenic changes, including forest management and conservation strategies and agroecological approaches. The topics may concern ecology and biogeography issues as well. This Special Issue will provide a unique context to discuss the important issues. To tackle such a major endeavor, we will gather research on all continents and all kinds of ecosystems. In addition, all kinds of organisms will be considered in order to obtain a comprehensive picture of the most major potential changes.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
