

Special Issue

Plant-Microbes Interactions in the Context of Abiotic Stress

Message from the Guest Editors

We are accepting submissions for an upcoming *Plants* Special Issue entitled "Plant-Microbes Interactions in the Context of Abiotic Stress". This Special Issue will gather information allowing a deeper comprehension of plant-microbe interactions under abiotic stress and physiological responses and molecular signaling pathways that are at the basis of these interactions. Topics of interest include but are not limited to symbiotic microbes, microbial factors, plant-microbe chemical signaling, gene expression, hormonal control of interactions as well as plant stress responses (stress adaptation, modifications of plant anatomy and the patterns of metabolite contents, stress-responsive genes, physiological responses). In this Special Issue, we will explore all interactions between plants and prokaryotes or fungi under abiotic stress conditions. Different types of manuscripts, including original research papers, perspectives, or reviews, are welcome.

Guest Editors

Dr. Marzena Sujkowska-Rybkowska

Department of Botany, Institute of Biology, Warsaw University of Life Sciences SGGW, 02-787 Warsaw, Poland

Dr. Wojciech Borucki

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
