

## Special Issue

# New Insight into Cadmium Phytoremediation – Volume II

### Message from the Guest Editor

Cadmium (Cd) is a toxic heavy metal that is mainly consumed when a person eats agricultural products produced in a Cd-contaminated field, and its accumulation in the human body can cause severe health issues. Cd pollution in agricultural fields is an extensive problem all over the world and must be resolved as soon as possible in order to ensure the stable production of agricultural products and food safety. Phytoremediation is one of the most effective methods for purifying the soil of Cd. In general, the amount of Cd taken from the soil by phytoremediation depends on the biomass and Cd concentration in the aerial parts of the plants. Cd absorption from the soil to the plant roots and translocation within the plant occurs mainly via heavy metal transporters. However, the mechanisms of Cd accumulation in the aerial parts are not well understood in many plant species. We are now re-opening the Special Issue as Volume II. We welcome research articles on both Cd phytoremediation and the materials that can be used for it in the future, as well as candidate plant species that accumulate considerable amounts of Cd and genetic resources related to Cd absorption and/or translocation.

### Guest Editor

Dr. Ryuichi Takahashi

Prefectural Agricultural Experiment Station Dept of Crop Research,  
Akita 010-1231, Japan

### Deadline for manuscript submissions

closed (29 February 2024)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB  
R3T 2N2, Canada

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
