

## Special Issue

# Characterization of Signal Transduction in the Plant Hormone

### Message from the Guest Editor

This Special Issue aims to collect manuscripts covering the current progress in characterization of signal transduction in plant hormones. The central focus will be research progress on molecular mechanisms of plant hormones including the use of integrative approaches to evaluate the role of signaling proteins, expression patterns, and protein–protein interactions. All manuscripts, including original research articles, reviews, and methodology papers, are highly encouraged.

### Guest Editor

Prof. Dr. Yi-Yin Do

Department of Horticulture and Landscape Architecture, National Taiwan University, Taipei 10617, Taiwan

### Deadline for manuscript submissions

closed (30 September 2022)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
