

Topical Collection

Feature Papers in Plant Systematics, Taxonomy, Nomenclature and Classification

Message from the Collection Editors

As is apparent from the title, this Topical Collection “Feature Papers in Plant Systematics, Taxonomy, Nomenclature and Classification” aims to collect high-quality research articles, short communications, and review articles in all fields about the latest studies and feature papers in plant systematics, taxonomy, nomenclature and classification. For the selected works of this section on plant systematics, taxonomy, nomenclature and classification, we will focus on plant discovery and identification, description and nomenclature, classification and evolution.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
