

## Special Issue

# Ecophysiology and Ecology of Grassland

### Message from the Guest Editors

Natural grassland is one of the most important ecosystems on the earth, and it has multiple functions such as biomass production, ecology, economy, culture and entertainment. Natural grassland is facing various threats around the world and has become one of the most degraded ecosystems due to overuse, low maintenance input and climate change. Biomass production and species composition can comprehensively reflect grassland structure and functional changes in response to abiotic stress and environmental change. The ecophysiological and ecological analysis of key species and the community traits will be beneficial to better understand the dynamics of biomass elaboration and renewal of natural grassland. This Special Issue mainly focuses on the integrated research from species to ecosystem level in natural grasslands in response to human disturbances, abiotic stresses and climate change. We welcome the manuscripts submitted by newly minted PhDs to present their updated research results within the topic.

### Guest Editors

Prof. Dr. Bingcheng Xu

State Key Laboratory of Soil Erosion and Dryland Farming on the Loess Plateau, Northwest A&F University, Yangling 712100, China

Prof. Dr. Zhongming Wen

1. College of Grassland Agriculture, Northwest A&F University, Yangling 712100, China

2. State Key Laboratory of Soil Erosion and Dryland Farming on the Loess Plateau, Northwest A&F University, Yangling 712100, China

3. Institute of Soil and Water Conservation, Chinese Academy of Sciences and Ministry of Water Resources, Yangling 712100, China

### Deadline for manuscript submissions

closed (20 January 2023)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
