

Special Issue

Integrated Pest Management in Fruit Crops

Message from the Guest Editors

This Special Issue “Integrated Pest Management in Fruit Crops” welcomes you to submit original research articles and reviews on ecological interactions between organisms and agriculturally related issues. The focus of this Special Issue is to present research that addresses interactions between plants, insects, and mites, and that has led to economically important pest-related issues regarding fruit crop production around the world. Research articles and reviews are welcomed that identify or address current or potential pest-related issues regarding fruit crops. Analytical tools to manage pest-related problems, including, but not limited to, pest detection, occurrence monitoring, trapping techniques, behavioral techniques, electrophysiological techniques, population dynamics, chemical control, biological control, preharvest pest management, postharvest pest management, etc., are especially welcomed research topics. We sincerely appreciate your consideration of this invitation to contribute to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
