

Special Issue

Mediterranean Plants

Message from the Guest Editors

Plants grown and exposed to Mediterranean climatic conditions with hot and dry summer periods, low winter temperatures and episodic frosts are a source of information for the functioning and featuring of the seasonality in Mediterranean ecosystems. In addition, Mediterranean plants have been presented as vehicles for expressing historical knowledge and environmental attributes; gradually scientific data have given us important insights into plant growth, structure, and function. Much remains to be discovered, and further work is required to reveal the natural heritage of Mediterranean plants. With the current environmental and social threats mainly posed by an expanding human population, the essential importance of Mediterranean plants will once again be appreciated. This Special Issue of *Plants* will highlight the function, structure, diversity, biogeography and conservation of Mediterranean plants, as well as their interactions with the abiotic and biotic environment.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
