

## Special Issue

# Plant Cell Signalling under Stress

### Message from the Guest Editors

This special issue accepts to publish sound research on plants' responses to biotic and abiotic stress. High-quality papers covering molecular, biochemical, omics, and physiological aspects in response to biotic and abiotic stress, including works unveiling signaling cascades and models of plants' perception and response, are welcome. This issue accepts original research papers, perspectives, hypotheses, opinions, reviews, modeling approaches, and methods) focused on this domain area.

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
