

Special Issue

Current Research on Seed Development, Germination and Vigor

Message from the Guest Editors

The aim of this Special Issue of *Plants* is to build a community of authors and readers to discuss the current research on seed development, germination, and vigor in plants. The contents refer to grain filling and shape, seed production and maturity, seed germination and dormancy, seedling establishment, seed vigor and stress tolerance, etc. We welcome all kinds of submissions, including original research papers, reviews, and methods. We hope that the manuscripts submitted in this Special Issue will help to address the fundamental questions on seed science and technology research to promote crop productivity.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
