Multiscale Methods in Plasma Physics

Message from the Guest Editors

The US–Japan Joint Institute of Fusion Theory Workshop on “Multiscale Methods in Plasma Physics” was held August 22–24, 2017 at the University of Colorado, Boulder, USA. This workshop focused on implicit methods combined with multiscale techniques for bridging fine and coarse scales in plasma physics. Topics included coupling the microturbulence scale with the transport scale in fusion plasmas, orbit-averaging, subcycling, and multiple time step techniques in particle-in-cell models and equation-free methods. International experts in this emerging field came together for a small discussion-oriented workshop. Select papers from work reported at this workshop are highlighted in this Special Issue.

Guest Editors

Prof. Dr. Scott E. Parker

Department of Physics, Campus Box 390, University of Colorado, Boulder, CO 80309, USA

Prof. Dr. Seiji Ishiguro

Department of Helical Plasma Research, National Institute for Fusion Science, 322-6 Oroshi-cho, Toki City 509-5292, Japan

Deadline for manuscript submissions

University, Princeton, NJ 08540, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Inspec,
CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.6 days after
submission; acceptance to publication is undertaken in 4.6
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
