

Special Issue

Plasma Medicine

Message from the Guest Editors

Plasma medicine is a multidisciplinary field of research that focuses on studies on the interaction of low-temperature plasmas with biological cells and tissues. Many advances took place in the last decade that promise to make cold plasma technology a basis for new medical therapies. However, many of the mechanisms whereby plasma affects cells and tissues are still not well understood. For this Special Issue of the journal Plasma, researchers active in all aspects of the field of plasma medicine are invited to submit their latest results. Papers covering fundamental studies as well as papers discussing applications are welcome. Topics of interest generally include (but not limited to)

- Low temperature plasma
- Cells
- Tissues
- Medicine
- Reactive species
- Plasma medicine

Guest Editors

University, Princeton, NJ 08540, USA

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, Inspec,
CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 22.6 days after
submission; acceptance to publication is undertaken in 4.6
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
