

Special Issue

A New Development Model for a More Sustainable, Resilient and Fair World – Volume 2

Message from the Guest Editor

By adopting a multidisciplinary and holistic approach to all dimensions of sustainability and through community engagement, community resilience can be increased through a structural combination of environmental sustainability, territorial safety and policies that combat climate change. The purpose of the second volume of this Special Issue is to emphasize the scientific results that can support the implementation of this new development model to guide the transition towards real sustainable development in all its dimensions (economic, social, environmental and institutional) in the framework of this crisis scenario. I would like to encourage you to submit your original research papers, short communications of preliminary results, review articles or commentaries to stimulate the discussion on this topic.

About the Journal

Message from the Editor-in-Chief

Pollutants is a multidisciplinary, peer-reviewed, open-access journal of all aspects of environmental pollution published quarterly online by MDPI. It covers Environmental Sciences and Engineering, Environmental Systems, Water Resources, Environmental Economics and Policy, Environmental Health, etc. It publishes reviews, research articles, communications, and technical notes. Papers taking a holistic approach among multiple temporal and spatial scales are especially welcome.

Editor-in-Chief

Prof. Dr. Ali Elkamel
