

Special Issue

Analysis of Trace Pollutants in Complex Matrices

Message from the Guest Editors

The development of analytical techniques has involved the use of different types of extraction procedures and tools, in relation to the organic or inorganic nature of the pollutant. This Special Issue of pollutants, "Analysis of Trace Pollutants in Complex Matrices", aims to illustrate the latest research and advances in the analysis of pollutants in different matrices. This Special Issue accepts contributions covering all aspects of research related to analytical chemistry and may also include several scientific macro-areas, such as food chemistry or environmental chemistry.

About the Journal

Message from the Editor-in-Chief

Pollutants is a multidisciplinary, peer-reviewed, open-access journal of all aspects of environmental pollution published quarterly online by MDPI. It covers Environmental Sciences and Engineering, Environmental Systems, Water Resources, Environmental Economics and Policy, Environmental Health, etc. It publishes reviews, research articles, communications, and technical notes. Papers taking a holistic approach among multiple temporal and spatial scales are especially welcome.

Editor-in-Chief

Dr. Paolo Pastorino

Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle
d'Aosta, 10154 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, AGRIS, and many other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.8 days after submission; acceptance to publication is undertaken in 11.7 days (median values for papers published in this journal in the second half of 2025).
