

Special Issue

A New Development Model for a More Sustainable, Resilient and Fairer world

Message from the Guest Editor

It poses to all of us the challenge of rethinking sustainable pathways for our planet defining a new development model by transformative resilience. “Our common future” report (WCED 1987) sensed the need to introduce more efficient and sustainable production models in the use of energy and resources, reducing pollution and minimizing risks to health and accidents. Adopting a multidisciplinary and holistic approach on all dimensions of sustainability, community resilience can be increased through a structural combination of environmental sustainability, territorial safety and climate change contrasting policies. The purpose of this special issue is to emphasize the scientific results that can support the implementation of this new development model to guide the transition towards real sustainable development in all its dimensions (economic, social, environmental and institutional). I would like to encourage you to submit to this Special Issue your original research papers, short communication of preliminary results, review articles or commentaries to stimulate the discussion on this topic.

About the Journal

Message from the Editor-in-Chief

Pollutants is a multidisciplinary, peer-reviewed, open-access journal of all aspects of environmental pollution published quarterly online by MDPI. It covers Environmental Sciences and Engineering, Environmental Systems, Water Resources, Environmental Economics and Policy, Environmental Health, etc. It publishes reviews, research articles, communications, and technical notes. Papers taking a holistic approach among multiple temporal and spatial scales are especially welcome.

Editor-in-Chief

Prof. Dr. Ali Elkamel

Department of Chemical Engineering, University of Waterloo, 200

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, AGRIS, and many other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 40 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the first half of 2025).
