Deadline for manuscript  
submissions:

**closed (15 October 2016)**

### Message from the Guest Editors

Dear Colleagues,

Hybrid polymeric materials, namely materials comprised of polymers and carbon nanostructures or inorganic constituents, represent a wide, rapidly growing research area targeting applications such as organic electronics, bioelectronics, diagnostics-imaging, and sensing, among others.

This Special Issue is dedicated to the synthesis, characterization and application of these emerging classes of materials and, more specifically, to functional polymers/carbon-based nanostructures such as fullerene, carbon nanotubes and graphene, polymer-metal or metal oxide nanoparticles, and finally polymeric metallocomplexes.

Prof. Dr. Joannis K. Kallitsis  
Assoc. Prof. Dr. Georgios Bokias  
Dr. Valadoula Deimede

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
