**Message from the Guest Editors**

Polymers (organic or inorganic-hybrid) and polymer composites have great potential in green energy conversion due to being lightweight, having an inexpensive process, intrinsic low thermal conductivity and mechanical flexibility. In the arena of next-generation of flexible energy-conversion devices, polymer-based thermoelectric should be promising.

This Special Issue is concerned with design, simulation, synthesis, characterization and applications of polymer-related thermoelectric (including conjugated polymers, inorganic-organic polymers, and polymer composites), trying to understand how the morphology, nanostructures, and compositions to affect their performance. Topics may include synthesis, characterization, theoretical study, nano-engineering, morphology study and thermoelectric application.

Deadline for manuscript submissions:
closed (5 August 2018)

Message from the Editor-in-Chief

Since its foundation in 2009, Polymers has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of Polymers, the most recent one being 3.164.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Scopus (2017 CiteScore: 3.30), citations available in PubMed, full-text archived in PubMed Central, and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2019).
