Message from the Guest Editor

The use of polymeric materials from renewable resources dates very back in history, as naturally occurring polymers were among the first materials used by men. In the 19th century, natural materials, such as casein, natural rubber, and cellulose, were modified to obtain useful polymeric materials. Over the past few decades, the production and applications of synthetic polymers showed an almost exponential increase. However, concerns regarding depletion of fossil resources, wastes’ disposal and related issues, as well as government policies, have led to a continuously growing interest in the development of sustainable, safe and environmentally friendly plastics from renewable resources.

The aim of this Special Issue is to highlight the progress on monomers, synthesis, characterization, properties, and applications of polymers, copolymers, blends and composites from renewable resources.
Message from the Editor-in-Chief

Since its foundation in 2009, Polymers has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of Polymers, the most recent one being 3.164.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Scopus (2017 CiteScore: 3.30), Ei Compendex, CAS, Polymer Library, EBSCOhost and Current Contents - Physical, Chemical & Earth Sciences. Citations available in PubMed, full-text archived in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 4.3 days (median values for papers published in this journal in the first half of 2019).
