

Special Issue

Environmental Pollution and Control by Polymer Materials

Message from the Guest Editors

With the rapid development of economy and increasing demands of consumers, the amount of polymer materials used has tremendously increased globally. Polymer materials can be used as functional materials for environmental governance, such as air purification agents, oil–water separation membranes, ion exchange resins, etc. However, the non-biodegradable characteristics of polymer materials create serious environment problems, causing high levels of soil pollution, air pollution, water pollution, etc. In this context, this Special Issue aims to gather articles (research or review) in the field of the application of polymer materials in environmental governance and advanced treatment technology of environmental pollution caused by polymer materials.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
