

Special Issue

Recent Progress in Polymer Coatings

Message from the Guest Editors

Until now, topical issues on marine fouling have been associated with the coating of ship hulls; cooling pipes of engine cooling systems; and constructions with marine plankton, mollusks, and algae. Another important problem is the fight against the bacterial and fungal growth of various medical devices, which causes the spread of hospital infections. In addition, the issue of combating corrosion of metal structures and reinforced concrete structures is always relevant. This Special Issue is devoted to the development of **protective materials and coatings**, the study of their properties, comparisons with known analogues, and a description of the prospects for their application. We invite researchers in these fields to share their current results in this Special Issue or to outline the history of the creation and development of protective coatings in mini-reviews. Early bird discount can be enjoyed for manuscripts submitted before October 2023. For details, please contact shelly.gu@mdpi.com.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
