

## Special Issue

# Processing and Application of Polymer Based Flexible Electronics

### Message from the Guest Editors

Nowadays, flexible electronics-based organic polymers are widely applied in the fields of information, energy, medical treatment and so on. This Special Issue aims to publish recent works on processing polymer-based flexible electronics and their applications in sensor-, energy- and health-related areas. The following topics are encouraged: sensors (strain, pressure, temperature et al), wearable electronics, flexible energy storage devices, and flexible systems.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
