

Special Issue

The Application of Polymers on Multifunctional Electronic Textiles

Message from the Guest Editor

Electronic textiles are poised to revolutionize future wearable applications due to their wearing comfort and programmable nature. Electronic textiles with almost all desired functionalities, such as energy harvesting, energy storage, sensing, communicating, actuating, and display, have been realized with remarkably improved performance over the past decade. This Special Issue aims to highlight recent advances surrounding the application of polymers on multifunctional electronic textiles. A discussion of the design, fabrication, assembly, and manufacturing of multifunctional electronic textiles to meet electronic performance, practical considerations, and commercialization demands is also welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
