

## Special Issue

# Advances in Laser Processing of Polymer Materials

### Message from the Guest Editor

The laser processing of polymers has become an important field in applied and fundamental research. Laser techniques are attractive alternatives for the processing of soft materials, affording the sought-after versatility and reliability. Laser techniques can be used to fabricate substrates with a variety of high-precision patterns on different length scales, and can be applied in noncontact and flexible set-ups under a wide variety of environments. Laser processing can be adapted both to the materials' properties and to the desired surface pattern by controlling the laser characteristics.

This Special Issue aims to gather contributions on recent advances in the use of laser techniques for the processing of polymers, both concerning surface and bulk modification, micro- and nanostructuring, and considering both the fundamentals of laser processing and the applications of the modified polymer materials.

## About the Journal

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
