

Special Issue

Chitosan-Based Materials for Water and Wastewater Treatment

Message from the Guest Editor

Chitosan is a natural polymer from organic matter with characteristics such as supplying abundant raw material, non-toxicity, and easy biodegradation. Its good properties of flocculation, chelation, and ion exchange give chitosan and its derivatives unique advantages in water and wastewater treatment. This Special Issue will concentrate on highlighting timely research including the latest advances in the synthesis and characterization of chitosan-based functional materials and their applications in flocculation, adsorption, membrane filtration, and so on in water and wastewater treatment.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Fraunhofer-Institut für Angewandte Polymerforschung, Lehrstuhl für Polymermaterialien und Polymertechnologie, Universität Potsdam, Geiselbergstraße 69, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
