

Special Issue

Three-Dimensional Structures: Fabrication and Application

Message from the Guest Editor

Three-dimensional printing on the micron-scale finds its way into fields ranging from nanophotonics to cell-growth studies in biology, often as the technology that enables, for the first time, fabrication of complex three-dimensional structures. Polymers play an important role being the material of choice for structure fabrication and functionalization. This Special Issue of *Polymers* aims at collecting cutting-edge original research papers and reviews covering the most recent developments in the field of three-dimensional micro printing, from materials development to the latest applications. Prof. Dr. Georg von Freymann

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
