

Special Issue

Conductive Polymers for Electronic Devices, Displays and Sensors

Message from the Guest Editor

Conductive polymers (ICPs) are fascinating materials due to their remarkable characteristics, such as tunable electric properties, intrinsic redox activity, potential optical anisotropy, and easy fabrication. So far, ICPs have been explored for various applications, including antistatic and conductive films, biosensor fabrication, organic field-effect transistors, transparent organic-based electronic devices, light-emitting and photovoltaic devices, etc. In this Special Issue, we will provide a scientific platform to highlight advancements and innovative applications of conductive polymers in the fields of electronic devices, displays, and sensors. We cordially invite you to submit your latest research findings on these topics.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
