

Special Issue

Polymer Electrode Materials for Energy Storage

Message from the Guest Editors

This Special Issue of *Polymers* will highlight recent advances in the design, preparation, and application of polymer electrode materials. Contributions may address conducting polymers, polymer–nanomaterial hybrids, redox-active macromolecules, ionogels, and multifunctional composites, as well as studies focused on interfacial processes and charge transport phenomena. Original research articles, short communications, and comprehensive reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.9.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.
