

Special Issue

Polymers for Aesthetic Purposes

Message from the Guest Editor

This Special Issue, entitled "**Polymers for Aesthetic Purposes**", aims to focus on the latest advancements and applications of polymers, such as polydioxanone (PDO), poly-L-lactic acid (PLAs), polynucleotides, hyaluronic acid, and polycaprolactone (PCL) in aesthetic medicine. This Special Issue aims to explore the multifaceted roles of these polymers, their biocompatibility, and their mechanisms of action, along with the latest clinical findings and innovative techniques. Topics are welcome to focus on, but are not limited to, polymer-based fillers, threads, regenerative therapies, and combination treatments. This Special Issue also aims to delve into emerging trends, safety profiles, patient outcomes, and future directions in the use of these polymers for aesthetic enhancement. By bringing together research articles and reviews, this Special Issue seeks to provide a comprehensive platform for sharing knowledge and advancing the field of aesthetic medicine through the innovative use of polymers.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
