

Special Issue

Functional Graphene–Polymer Composites

Message from the Guest Editors

The functionalization of graphene allows us to tune the derived graphene–polymer composite properties, improving the native properties of the polymer matrix and inducing novel features such as electrical and thermal conductivity, fire retardancy and EMI shielding. The aim of this Special Issue is to publish original articles, critical reviews, research notes, analyses, case studies and short communications relating to the progress in graphene functionalization techniques, the development and characterization of functionalized graphene-based polymer composites.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
