

Special Issue

Multifunctional Polymer Coatings: Synthesis, Properties and Applications

Message from the Guest Editor

The aim of this Special Issue is to analyse and publicise the current state of knowledge in the field of polymer coatings and related materials. Polymers can be chemically modified to fulfill certain properties or functionalities, such as durability (for outdoor applications), protection, or even filtration as a result of their adsorption/permeability capabilities. New coating or film materials based on such polymeric entities may lead to a further understanding of the processing–structure–property–functionality relationship. Original research or review articles on polymer coatings are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
