

Special Issue

Applications of Advanced Polymer Photocatalysts

Message from the Guest Editor

Energy issues have become a hot topic for research given recent developments. Photocatalysis is considered one of the effective ways to alleviate environmental pollution and achieve energy conversion. Multifunctional polymers play an extremely important role in the design and research of photocatalysts due to their low cost and high functionality. This Special Issue aims to collect research articles related to the application of polymer materials in photocatalysis, such as in driving photocatalytic reactions, the photoelectric properties of polymer materials, the processes and characteristics of photocatalysis, etc. We welcome all scholars to submit manuscripts.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry & Polymers and Plastics)
