

Special Issue

Developments in Epoxy Polymers and Composites

Message from the Guest Editors

Epoxy polymers and composites have gained great popularity due to their good mechanical properties, chemical resistance, thermal stability, high adhesiveness, electrical insulating properties, and ease of processing, and are widely used in various industrial applications. High-performance characteristics of epoxy composites are achieved by the incorporation of natural and synthetic fibers and organic and inorganic fillers, including nanosized fillers. The nature of fillers, their concentration, and processing methods have a greater influence on the properties of epoxy composites. This Special Issue, entitled “Developments in Epoxy Polymers and Composites”, focuses on recent developments in the methods of preparation, modification, characterization, and applications of epoxy polymers and epoxy-based composites. We invite the research community to contribute to this Special Issue by submitting comprehensive reviews or original research papers.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
